

ABSTRACT

A method of enabling redemption of a first coupon, the first coupon being printed on surface and including machine-readable coded data that can be sensed by a sensing device configured to generate interaction data based on the sensed coded data, the method comprising the steps, performed in a computer system, of receiving the interaction data representing interaction of the sensing device with the coded data, the interaction data enabling the first coupon to be identified in the computer system; transmitting information identifying the first coupon to a coupon administrator that is configured to redeem the first coupon on the basis of the information.
